

FAREWAY *plus*

Installation policy

When installing *FAREWAYplus* in a taxi, you must ensure that:

1. The *FAREWAYplus* device is installed with a fully functional meter application
2. If a taxi operator wants to keep the meter already installed in their taxi, *FAREWAYplus* must be installed in addition to the existing meter
3. The *FAREWAYplus* device is installed in a position visible to both the driver and passenger regardless of whether *FAREWAYplus* is installed on its own or in conjunction with an existing meter
4. Installers cannot take out an existing meter unless they have the taxi operator's permission
5. Due to regulations, if in Queensland and Victoria a taxi operator wants to keep their meter, the installer must integrate *FAREWAYplus* with that meter
6. Any questions on how to integrate *FAREWAYplus* with the meter are to be directed to Spoz Chellos on (02) 9020 2146
